

COVE FORT/SULPHURDALE GEOTHERMAL ENERGY PROJECT

VITALS

Location: Cove Fort, Utah

Technology: Binary Geothermal Power Plant

Company: ENEL Green Power No. America, Inc. (Reno, NV)

THE BLM ACTION – BLM’s decision authorizes:

- Construction of a 20 MW net power plant, production and injection pipelines, a substation and a transmission line.
- The project will use six existing geothermal production wells and three existing water injection wells.

BY THE NUMBERS – the project is expected to:

- Generate enough electricity to power approximately 20,000 American homes.
- Create up to 250 construction jobs and numerous permanent operation jobs.
- Be located on 50 acres of BLM-managed lands.

ADDITIONAL PROJECT INFORMATION

- Construction of the proposed power plant will begin in late 2012, and the facility is expected to be completed and operational by December 2013.
- The U.S. Fish and Wildlife Service and U.S. Forest Service were cooperating agencies during the development of the Environmental Assessment.
- No endangered species are known to exist in the project area.
- Electricity generated from geothermal well energy provides base power load 24 hours per day with no significant environmental impacts.
